Shinotsu Shrine – Main Gate

Important Cultural Property

[A.D.1872]

The Shinotsu Shrine Main Gate was originally constructed as the North Otemon Main Gate for Zeze Castle, and was reconstructed in 1872 as the main gate for Shinotsu Temple after the castle was abandoned. It is a koraimon style gate, a popular style for castle gates of the time, and has a roof with ceramic tiles set in a wave pattern. The hollyhock flower crest of the Honda clan who ruled Zeze Castle can also be observed on the gate.
