#### Stone Relief Pagoda Tower

Designated Tangible Cultural Property of Otsu City

This stone pagoda tower is 106 centimeters tall, 60 centimeters long, and 12 centimeters wide. However, since part of the lower region of the tower is missing, it is thought that the tower was originally at least 150 centimeters tall. The tower body, roof, and pinnacle are well balanced, and Sanskrit characters are written on the body of the tower. The upper part of the tower is narrowed and roofed, and the three-dimensional structure of the roof is considered to be very creative for the time.
